New York, August 8 .- The difficulty the Knights of Labor, arrived in the city, and this forenoon he made three different attempts to have a conference with Third Vice President Webb in regard to a peaceful solution of the trouble. Mr. Webb refused to talk with him and motioned him out of his

Then Mr. Holland talked the matter over with Mr. Toucey, and the latter over with Mr. Toucey, and the latter went to see Mr. Webb. This gentlean remained obdurate. Then Mr. Holland asked Mr. Toucey for the reinstatement of the discharged men, but got no reply. Mr. Holland warned Mr. Toucey that he and Mr. Webb would be responsible if any strike resulted.

that he and Mr. Webb would be responsible if any strike resulted.

The district committee of the Knights will meet and further consider the matter. Mr. Powderly, President of the Knights, and Mr. Hayes, the Secretary, are in Philadelphia, ready to be called if their presence here is desired. The improvement is negative among the employees their presence here is desired. The impression is growing among the employes of the road that the war upon the Knights was decided upon some time ago, and that Mr. Depew being opposed to it, went to Europe, so as to be absent when the discharges occurred.

New York, August 8.—The strike of the employes on the New York Central was begun at 7:30 to-night. Not a train has left the depot at Forty-second street since that hour. The Grand Union hotell is crowded with people who expected to leave the city and who had engaged passage for various points. At half past 8 o'clock a gentleman reached the hotel and announced that the engineer and men employed in running an incoming train had deserted their posts in the tun-nel at Eighty-sixth street, and left the

train standing there. He and the other passengers had to get out and make their way to Forty-second street on foot or by horse car.

New York Central and Vanderbilt lines, New 1 ork Central and Vanderbilt lines, owing to the discharge of Knights of Labor and Brotherhood men, broke like a flash from a clear sky shortly after 6 o'clock to-night. All the length of the Central was tied up. Trains were left by the crews where they stood when the order came. Two pussenger trains were left at Eighty-sixth atreet in the word of the contral way and the contral way and the contral way are the stood when the order came. Two pussenger trains

Forty-second street to Yonkers, and on the west side from St. John's Park to Yonkers were placed on duty guarding the tracks and the property of the railroad company. The depot at Forty-second street was under the protection of the full force of police from the twenty-third sub-precinct, and there were assisted by the members of the boat patrol. Inspector Byrnes' detectives guarded the switches and signal stations along the road to Yonkers.

After these arrangements had been made word reached police headquarters that some of the strikers intended to take

possession of the switch house at Seventh street and Fourth avenue. Inspect or Byrnes at once detailed two of his trustworthy detectives to watch that point. The Inspector himself decided to remain at headquarters all night.

York Central, on being interviewed said question, as set forth by official corresthat the strike extended only to West pondence lately published: "I think that the strike extended only to West

The strike was ordered on account of der the orders overy train was abandoned no matter where it might be. The 7:10 train for Montreal was waiting the signal at the Grand Central depot when the engineer, fireman and brakemen left it and walked out of the depot. Efforts made to ascure men to fill their places were without avail. The men on other trains also left them. Travel was thus not only blocked on the Central road, but also on the New York & New England and New York & Harlem roads, which use the tracks of the Central road as far as Melrose. There is great excitement at the depot, where great crowds of people are gathered, who expected to take trains out of the city. The hotels in the neighborhood are crowded with disappointed traveters.

Number of Men Out.

**Number of Men Out.*

At a late hour Vice President Webb stated that in the yards of the Grand Central depots at Forty-second street. Fiftp-sixth street, and at West Albany there about 850 men out. These men were all switchmen, and there was no trouble with the engineers or firemen. Between midnight and daylight he intended to put on men and clear the tracks of a few stray cars and get ready to run out trains after 7 o'clock. He said that there might be trouble when this was attempted, but the company would afford ample police protection to the men who remained loyal to them

In Mr. Webb's office a telegraph instrument was clicking at a fast rate. A reporter who could read the instrument heard Utica call New York, and ask for men to be sent there to get passenger cars out of the yard. Another message from Palmyra said that the freight yards at the point were blocked and all freight at a standstill. Then New York called up Syracuse repeatedly and could get no answer. It was rumored that a number of operators would go out at midnight. These messages would seem to contradict the statement of Mr. Webb that there was no trouble west of Albany.

In the waiting room of the Grand Central depot a notice was posted that

The Lake Shore is a Vanderbilt road, but the dispatcher said there had been no intimation of any trouble whatever on the line. Eugineers in the employ of the Nickel Plate, another Vanderbilt road, were questioned about the same hour. They were equally surprised at the news of the strike on the New York Central.

Will Have to Change Care

ALBANY, N. Y., August S .- The o'clock train out of New York, which ar ived here on time, now lies in the yard here. People in a hurry to go south and west go via the Delaware & Hudson road to Binghamton, connecting there with the Erie road. The night boat to New York to-night had an unusually large passenger list. It looks as though the only direct route to New York to-morrow will be by boat.

witness a demonstration which, from present indications, will eclipse any of a like character ever witnessed in Chicago. The first Monday in September this year falls on the first of the month, and two big parades will tramp about the streets and afterwards picnic. For nearly two months the Entertainment Committee of the Knights of Labor and the Trades and Labor Assembly have been at work perfecting arrangements for the respective parades and picnics. This year, as last, the two bodies will march separate and at different hours, and although efforts were made with a view to having a monster joint parade and picnic, all attempts in that direction have failed.

The professor cautioned the teachers to teach their pupils proper reverence for age and position, and said that the indifference and seeming defiance of Phe average American youth probably springs from a mistaken idea of liberty—of civil liberty.
